EDUCATION

Bandung Institute of Technology <i>Bachelor of Engineering – Informatics Engineering</i> GPA: 3.59 / 4.00 (Cum Laude)	Aug 2021 – Aug 2025 <i>Bandung, Indonesia</i>
--	--

EXPERIENCE

Software Engineer <i>MainStory</i>	Apr 2025 – Present <i>Jakarta, Indonesia (Remote)</i>
--	--

- Architected an automated Quality Control (QC) audit system using Redis Queue for asynchronous tasks and LLMs to review 500+ daily reports and photos, reducing manual workload and improving content oversight.
- Built an automated hiring pipeline using n8n: engineered scrapers for Glints/Jobstreet/KitaLulus, WhatsApp outreach via WATI, and implemented AI-driven scoring of Hireflix interviews to replace manual screening.
- Revamped the end-to-end CI/CD pipeline for both front-end and back-end services using Docker, automating deployments for staging and production environments to reduce manual errors and accelerate release cycles.
- Established an observability stack integrating Grafana and Loki for centralized logging, and configured automated Slack alerting for production and staging errors, leading to faster debugging and incident response.
- Secured internal staging environments by deploying a self-hosted OpenVPN server, migrating infrastructure from public-facing access to a private network to eliminate external security vulnerabilities.
- Engineered monetization features including nanny rating, tipping, and automated overtime calculation, integrating with the Xendit payment gateway to successfully increase average nanny earnings by 10-20% monthly.

Web3 Developer (Freelance) <i>Self-Employed</i>	Jan 2025 – Jun 2025 <i>(Remote)</i>
---	--

- Launched 5 promotional websites for cryptocurrency projects, engineering complex and interactive user interfaces with Next.js and Tailwind CSS, and integrating 3D objects and animations using Spline to drive user engagement.
- Developed a supporting backend using Python and FastAPI to fetch and process on-chain data, leveraging Large Language Models (LLMs) via prompt engineering for advanced data synthesis and interpretation.
- Expanded project accessibility by developing a browser extension and a mobile application using React Native.

Frontend Developer Intern <i>AssistX Enterprise</i>	Nov 2024 – Apr 2025 <i>Jakarta, Indonesia (Remote)</i>
---	---

- Engineered and implemented new data-driven pages and reusable interactive components for an internal monitoring platform using Next.js and Material UI, delivering a scalable and high-performance front-end solution.

Software Engineer <i>AVS Simulator</i>	Sept 2024 – Dec 2024 <i>Bandung, Indonesia</i>
--	---

- Transformed an autonomous car's perception system by expanding its YOLO model's detection from a single class to a comprehensive set of 5+ road objects, while resolving instabilities to ensure smooth and continuous tracking.
- Owned the end-to-end engineering of the control system, deploying the recognition model on an NVIDIA Jetson Nano to process video at 60 FPS and command the vehicle's actuators via serial communication.

Software Engineer Intern <i>Charoen Pokphand Indonesia</i>	Jul 2024 – Sept 2024 <i>Jakarta, Indonesia</i>
--	---

- Pioneered the company's first biometric attendance solution, single-handedly designing and building the verification backend with Python and FastAPI to eliminate identity fraud for 5,000+ employees across 2,000+ stores.
- Enhanced the front-end React Native app by introducing a suite of accountability features, headlined by randomized check-ins and the seamless integration of the new biometric system.

CERTIFICATION

Bangkit 2024 <i>Cloud Computing</i>	Sept 2024 – Jan 2025
--	----------------------

- Gained hands-on experience deploying scalable applications on Google Cloud, utilizing GKE for container orchestration, Cloud Run for serverless computing, and Terraform for infrastructure automation (IaC).
- Applied DevOps and SRE principles by configuring CI/CD workflows, implementing security best practices, and establishing observability using Google Cloud's operations suite for monitoring, logging, and alerting.

TECHNICAL SKILLS

Languages: Python, TypeScript, Go, Java, C#, PHP
Frameworks & Libraries: React, Tailwind CSS, Next.js, Node.js, Jest, FastAPI, React Native, Flutter, Laravel
Databases: PostgreSQL, MySQL, MongoDB, Redis, Redis Queue
Cloud, DevOps, & CI/CD: Docker, AWS, GCP, GitHub Actions, OpenTelemetry, Grafana, Microservices
Tools & Methodologies: Git, Agile, Scrum, Jira, GitHub Copilot, Cursor
