EDUCATION

Bandung Institute of Technology <i>Bachelor of Engineering – Informatics Engineering</i> GPA: 3.59 / 4.00 (Cum Laude)	August 2021 – August 2025 <i>Bandung, Indonesia</i>
--	--

EXPERIENCE

Software Engineer <i>MainStory</i>	April 2025 – Present <i>Jakarta, Indonesia (Remote)</i>
--	--

Web3 Developer (Freelance) <i>Self-Employed</i>	January 2025 – June 2025 <i>(Remote)</i>
- Launched 5 promotional websites for cryptocurrency projects, engineering complex and interactive user interfaces with Next.js and Tailwind CSS, and integrating 3D objects and animations using Spline to drive user engagement. - Developed a supporting backend using Python and FastAPI to fetch and process on-chain data, leveraging Large Language Models (LLMs) via prompt engineering for advanced data synthesis and interpretation. - Expanded project accessibility by developing a browser extension and a mobile application using React Native.	

Frontend Developer Intern <i>AssistX Enterprise</i>	November 2024 – April 2025 <i>Jakarta, Indonesia (Remote)</i>
Engineered and implemented new data-driven pages and reusable interactive components for an internal monitoring platform using Next.js and Material UI, delivering a scalable and high-performance front-end solution.	

Junior Software Engineer <i>AVS Simulator</i>	September 2024 – December 2024 <i>Bandung, Indonesia</i>
- Transformed an autonomous car’s perception system by expanding its YOLO model’s detection from a single class to a comprehensive set of 5+ road objects, while resolving instabilities to ensure smooth and continuous tracking. - Owned the end-to-end engineering of the control system, deploying the recognition model on an NVIDIA Jetson Nano to process video at 60 FPS and command the vehicle’s actuators via serial communication.	

Software Engineer Intern <i>Charoen Pokphand Indonesia</i>	July 2024 – September 2024 <i>Jakarta, Indonesia</i>
- Pioneered the company’s first biometric attendance solution, single-handedly designing and building the verification backend with Python and FastAPI to eliminate identity fraud for 5,000+ employees across 2,000+ stores. - Enhanced the front-end React Native app by introducing a suite of accountability features, headlined by randomized check-ins and the seamless integration of the new biometric system.	

Computational Engineering Laboratory Assistant <i>School of Electrical Engineering and Informatics, Bandung Institute of Technology</i>	August 2023 – December 2024 <i>Bandung, Indonesia</i>
- Selected from a pool of 60+ applicants to serve as a Course Assistant for Algorithm Strategy, Probability & Statistics, Linear Algebra & Geometry, and Discrete Mathematics. - Crafted project specifications and graded student work (projects, assignments, and quizzes) for 170+ students.	

PROJECTS

Project Name <i>Technologies Used</i>	Month Year
- Description of the project and what it accomplishes - Key technologies or methodologies used - Results or impact of the project	
Another Project <i>Technologies Used</i>	Month Year
- Brief description of this project - What you learned or achieved	

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, HTML/CSS, SQL

Frameworks: React, Node.js, Express, Spring Boot, Django

Developer Tools: Git, VS Code, IntelliJ, Eclipse

Databases: MySQL, PostgreSQL, MongoDB

Libraries: pandas, NumPy, Matplotlib
