EDUCATION

Bandung Institute of Technology

Bachelor of Engineering – Informatics Engineering

GPA: 3.59 / 4.00 (Cum Laude)

August 2021 – August 2025

Bandung, Indonesia

EXPERIENCE

Software Engineer

MainStory

April 2025 – Present

Jakarta, Indonesia (Remote)

- Architected an automated Quality Control (QC) audit system, leveraging Large Language Models (LLMs) to review 500+ daily nanny reports and photos, significantly reducing manual workload and improving content oversight.
- Revamped the end-to-end CI/CD pipeline for both front-end and back-end services using Docker, automating deployments for staging and production environments to reduce manual errors and accelerate release cycles.
- Established a comprehensive observability stack integrating Grafana and Loki for centralized logging, and configured automated Slack alerting for production and staging errors, leading to faster debugging and incident response.
- Engineered core monetization features including nanny rating, tipping, and automated overtime calculation, integrating with the Xendit payment gateway to successfully increase average nanny earnings by 10-20% monthly.
- Developed key operational automation systems, including performance-based payroll calculation and an intelligent auto-assignment mechanism for nannies, eliminating hours of manual administrative work.
- Integrated a headless CMS using Builder.io, empowering the content team to manage and publish articles and news independently, which accelerated content delivery by 30%.

Web3 Developer (Freelance)

Self-Employed

January 2025 – June 2025

(Remote)

- Launched 5 promotional websites for cryptocurrency projects, engineering complex and interactive user interfaces with Next.js and Tailwind CSS, and integrating 3D objects and animations using Spline to drive user engagement.
- Developed a supporting backend using Python and FastAPI to fetch and process on-chain data, leveraging Large Language Models (LLMs) via prompt engineering for advanced data synthesis and interpretation.
- Expanded project accessibility by developing a browser extension and a mobile application using React Native.

Frontend Developer Intern

AssistX Enterprise

November 2024 – April 2025

Jakarta, Indonesia (Remote)

- Engineered and implemented new data-driven pages and reusable interactive components for an internal monitoring platform using Next.js and Material UI, delivering a scalable and high-performance front-end solution.

Junior Software Engineer

AVS Simulator

September 2024 – December 2024

Bandung, Indonesia

- Transformed an autonomous car's perception system by expanding its YOLO model's detection from a single class to a comprehensive set of 5+ road objects, while resolving instabilities to ensure smooth and continuous tracking.
- Owned the end-to-end engineering of the control system, deploying the recognition model on an NVIDIA Jetson Nano to process video at 60 FPS and command the vehicle's actuators via serial communication.

Software Engineer Intern

Charoen Pokphand Indonesia

July 2024 – September 2024

Jakarta, Indonesia

- Pioneered the company's first biometric attendance solution, single-handedly designing and building the verification backend with Python and FastAPI to eliminate identity fraud for 5,000+ employees across 2,000+ stores.
- Enhanced the front-end React Native app by introducing a suite of accountability features, headlined by randomized check-ins and the seamless integration of the new biometric system.

Computational Engineering Laboratory Assistant

School of Electrical Engineering and Informatics, Bandung Institute of Technology

August 2023 – December 2024

Bandung, Indonesia

- Selected from a pool of 60+ applicants to serve as a Course Assistant for Algorithm Strategy, Probability & Statistics, Linear Algebra & Geometry, and Discrete Mathematics.
- Crafted project specifications and graded student work (projects, assignments, and quizzes) for 170+ students.

PROJECTS

Project Name <i>Technologies Used</i>	Month Year
• Description of the project and what it accomplishes • Key technologies or methodologies used • Results or impact of the project	
Another Project <i>Technologies Used</i>	Month Year
• Brief description of this project • What you learned or achieved	

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, HTML/CSS, SQL
Frameworks: React, Node.js, Express, Spring Boot, Django
Developer Tools: Git, VS Code, IntelliJ, Eclipse
Databases: MySQL, PostgreSQL, MongoDB
Libraries: pandas, NumPy, Matplotlib
